

Lab 2 - Exploring Hybrid Mobile Technologies

Overview

This lab sheet focuses on the following aspects.

- Understanding how hybrid mobile apps work.
- Exploring Cordova.
- Exploring Ionic framework.

Understanding how Hybrid apps work

Exploring Cordova

1. Follow the steps here to create a cordova project
[Creating your first Cordova app - Apache Cordova](#)
2. Go through the steps here to run the cordova app on Android
([Android Platform Guide](#))
3. Understand the folder structure and try to run the same application as a desktop application.
[Electron Platform Guide](#)

Exploring Ionic

Ionic is based on Cordova and provides React and Angular support.

4. Follow the steps here to setup ionic on your environment
[Installing Ionic](#)
5. Depending on your preference follow the steps and create either a react or angular photo gallery app
[Your First Ionic App: Angular](#)
[Your First Ionic App: React](#)
6. Understand the component toolkit available in Ionic and also how Capacitor works to connect native libraries with web
[UI Components](#)
[Cordova vs Capacitor](#)
